
Class Diagram1
The Central Hub - the main entry point for the entire application.
WorkflowEngine
WorkflowDefinition
DefinitionRepository
The Definition Classes - They represent the static templates of the processes before they are actually executed.
<<instantiate>>
WorkflowInstance
The Instance Class - the bridge between the blueprints and the actual work patterns
The Data & Status Classes - attached to the running workflow
WorkflowData
InstanceStatus
Note a class but an enumaration
These are not part of the system but rather more of an extension of the system for the specific example scenario (TO BE MORE SPECIFIC, THERE ARE NOT ConcreteDirectors)
ClaimProcessDirector
AdmissionsProcessDirector
OnboardingProcessDirector
